Pearl Harbor

This Pirsch Junior Aerial Ladder Truck equipped with 55' Pirsch wood main ladder and 1250-gallon pump is serving our country at Navy Yard, Pearl Harbor.

Pirsch is proud of the fact that the Navy selected its product for fire protection at Pearl Harbor, but this is only one of many devices which Pirsch has produced for our armed forces.

In making your plans for new apparatus give consideration to Pirsch; pioneer in new and better apparatus for fire service.

PETER PIRSCH & SONS CO. KENOSHA, WIS.
